The Flipped Classroom

Turning Traditional Education on Its Head

Many educators are experimenting with the idea of a flipped classroom model. So what is it and why is everyone talking about it?

**why**

- personal
- differentiated
- effective
- time

**what**

Short content videos (NO MORE than 15 minutes)

- Quick pre class task
- Consolidation tasks done in class
Some ideas on how to 'flip' your classroom

- Create Powerpoints for the delivery of 'word heavy' content
- Scan notes/diagrams and make these available on your school's VLE
- Record your voice explaining a topic. Make it available to students via your VLE or sites like Tumblr
- Use Windows MovieMaker to create movie files that incorporate images and content
- Record directly from your PC screen with this freely downloadable software
- Create fun animations on this website and email the link to students
- Film yourself teaching a topic (if you're brave enough!)
- Several free blogging sites are now available. Write your blog and email the link to students
- Access ready made video clips by authors like pajholden
Paperless worksheets?

- **Goodreader**
  - $5.49

- **PDF Expert**
  - $10.49
Teacher records questions and places document.

Students record their answers and send them back.

Feedback is then given (either recorded or via notes).

Stamps help me see which work I have given final feedback to.
Digital cut and paste
socrative

- Cost: $FREE
- Creates questions in app and on PC (which syncs via your account)
- Can use as polling generator (don’t have to type in questions)
- Emails summary of results
- Students join “room”
- Can run off PC – no need for ipad!
- Space race auto assigns teams and is a big hit! (Especially with the boys)
